JEYAPRAKASH RATHINAVEL

Senior QA Automation Engineer | AI-Driven Test Automation | Business Analyst | Selenium · Playwright · Appium

+91 98944 48605 | jeyaprakash32@gmail.com | jeyaprakash32.github.io | India

PROFESSIONAL SUMMARY

Senior QA Automation Engineer with 16+ years of manual and automation testing for US, European and global clients in E-commerce, Insurance, Retail Banking, Investment Banking, Airline, Education and Leasing. Builds and maintains Selenium and Appium (Java) automation for web and mobile, along with UFT/QTP and TestComplete frameworks. Designs and builds AI-powered test automation tools, including self-healing automation, AI-assisted test generation and LLM integration. Picks up new AI tools quickly and turns them into working QA tools, and learns new frameworks such as Playwright fast. Works in Agile/SAFe teams covering functional, regression, system integration (SIT) and user acceptance (UAT) testing. Has led offshore teams, worked directly with onsite managers, clients and airline partners, and won delivery excellence awards at Cognizant, Capgemini and Hexaware. Also worked as a Business Analyst on retail banking enhancements: gathered requirements, wrote user stories with acceptance criteria and supported UAT through to sign-off. ISTQB certified.

CORE SKILLS

- **Automation:** Selenium WebDriver, Playwright, Appium, UFT / QTP, TestComplete & TestExecute, Business Process Testing (BPT)
- **AI in Testing:** LLM integration (cloud & local models), prompt engineering, AI coding assistants (Claude Code, Copilot), AI self-healing locators, AI test generation, token/cost governance
- **Languages & Stack:** Java, JavaScript, Python, VBScript, SQL.
- **Frameworks & Build:** Data-driven, keyword-driven and hybrid frameworks, Page Object Model, Maven, Eclipse, Extent Reports, reusable function libraries
- **Business Analysis:** Requirement gathering, stakeholder meetings, user stories & acceptance criteria, change request impact analysis, requirement traceability, UAT coordination
- **Test & ALM Tools:** Azure DevOps, HP ALM / Quality Center, JIRA, TFS, StarTeam, Perforce
- **Testing Types:** Functional, Regression, GUI, Web, Mobile App, SIT, UAT, Database, PCI and Production Support testing
- **Process:** Agile Scrum, SAFe (PI Planning), STLC / SDLC, test estimation, test strategy, requirement analysis, defect management, test metrics & ROI
- **Domains:** E-commerce, Property & Casualty Insurance, Retail Banking, Investment Banking (credit risk & trading), Airline reservations & departure control, Education, Leasing

TOOLS I'VE BUILT

- **AceQA (QA operating system):** One AI-powered platform for manual test management, Playwright web automation, live run viewing, audited self-healing locators and LLM token tracking.
- **PathLens (app flow mapping):** Mirrors a real Android phone in the browser over USB, records each screen and builds a visual map of navigation paths and input fields.

PROFESSIONAL EXPERIENCE

Innoflexion Technologies — **Jul 2022 - Present**

PROJECT 1: Cannondale (E-commerce, Web & Mobile) *Jul 2022 - Present*

Role: Senior Test Analyst | **Tools:** Selenium, Appium, Java, Eclipse, Maven, Extent Reports, ALM, Azure DevOps

E-commerce platform for a US bicycle brand, delivered in Agile sprints with web and native mobile app releases.

- Build and maintain Selenium WebDriver (web) and Appium (mobile app) automation in Java.
- Understand and estimate sprint user stories; automate in-sprint stories for functional checks and add them to the regression suite each sprint.
- Take part in PI Planning, sprint planning, backlog refinement, daily stand-ups, test-condition walkthroughs, sprint reviews and retrospectives.
- Run automated suites, publish results with Extent Reports, and track defects to closure in Azure DevOps and ALM.

Cognizant Technology Solutions — **Feb 2016 - Jul 2022**

PROJECT 2: Selective Insurance (Property & Casualty Insurance) *Aug 2019 - Jun 2022*

Role: Senior Test Analyst | **Tools:** Selenium, Java, Eclipse, Maven, Extent Reports, ALM, Azure DevOps

Insurance applications for a US property and casualty insurer, delivered by Agile teams within a SAFe release train.

- Developed Selenium-Java scripts for in-sprint functional and regression testing.
- Estimated sprint user stories and took part in PI Planning, backlog refinement, sprint planning and retrospectives.
- Ran test-condition walkthroughs with the team before automating stories.
- Executed automated suites, reported results each sprint and logged defects in ALM and Azure DevOps.

PROJECT 3: Banking UX Sustain Team (Retail Banking) *Feb 2016 - Aug 2019*

Role: Business Analyst / Senior Test Analyst | **Tools:** UFT, Selenium, JIRA, ALM

Sustain team for a retail bank's customer-facing web applications, working in weekly Agile sprints on fixes and enhancement projects.

- Gathered and analysed requirements for online banking enhancements with business stakeholders and the onsite team.
- Wrote user stories with acceptance criteria and walked developers and testers through them.
- Assessed change requests for impact and effort, and kept requirements traceable to test cases.
- Supported UAT with business users through to sign-off.
- Built Selenium and UFT automation scripts every weekly sprint.
- Analysed weekly sprint tickets and enhancement projects from specification documents.
- Wrote the Certification Plan, Certification Profile, Execution Schedule, Automation Strategy, Transition Strategy and code tracker for enhancement projects.
- Ran knowledge transfer sessions with partner testing teams for each enhancement project.
- Executed functional and automated tests and logged defects in ALM.
- Joined daily status calls with the onsite manager and offshore teams; prepared daily utilization reports for managers.
- Received the Star Performer of the Quarter award and the Delivery Excellence award (Q1 2019).

Capgemini — **Jan 2014 - Feb 2016**

PROJECT 4: Morgan Stanley CVA & CreditOne (Investment Banking) *Jan 2014 - Feb 2016*

Role: Senior Test Analyst | **Tools:** TestComplete, TestExecute, UFT, ALM, JIRA, Perforce

CVA measures counterparty credit risk using several methods; CreditOne books trades. Built regression and functional automation to keep CVA working correctly.

- Built automation test scripts in TestComplete and UFT, with macros and reusable components.
- Updated the automation framework to match client requirements.
- Analysed BRS documents and wrote functional test scenarios and test cases.
- Ran functional and regression suites and logged defects in JIRA.
- Prepared automation metrics and ROI data; sent daily status reports to the client and onsite manager.
- Ran monthly TestComplete technical sessions and shared domain knowledge with the team.
- Received the Delivery / Operational Excellence award for the Morgan Stanley account.

Hexaware Technologies — **Dec 2009 - Dec 2013**

PROJECT 5: Deutsche Leasing (Leasing) *Aug 2013 - Dec 2013*

Role: Test Analyst | **Tools:** ALM, StarTeam, SQL Server

Germany's largest manufacturer-independent leasing company. Tested partner creation and changes, offer creation, changes and transfer, and configuration management.

- Designed manual test cases from functional documents and ran them in ALM.
- Retested defect fixes, ran regression tests and wrote SQL queries for database checks.

PROJECT 6: Career Education Corporation (Education) *Mar 2013 - Jul 2013*

Role: Test Analyst | **Tools:** QTP, HP Quality Center, TFS, SQL Server

US post-secondary education provider with campus and online programs for about 116,000 students.

- Built the QTP automation framework and function libraries; wrote VBScript and Business Process Testing (BPT) scripts in QTP + QC.
- Designed test cases from functional design documents, use cases and wireframes; reviewed test cases written by the team.
- Logged defects in TFS and QC, ran SQL database checks, and sent daily and weekly status reports to the client.

PROJECT 7: Northern Trust Investment Passport (SIT) *Oct 2012 - Feb 2013*

Role: Test Analyst | **Tools:** QTP, Quality Center, SQL Server

Web application that produces monthly and quarterly investment performance reports for global investors.

- Maintained QTP automation scripts, ran manual and automated tests and logged defects in QC.
- Validated product, client, account, fund and performance data with SQL queries.

PROJECT 8: Air Canada User Acceptance Testing (Airline) *May 2010 - Sep 2012*

Role: Test Analyst | **Tools:** Amadeus Customer Service Point, IBM-TPF, StarTeam

Largest airline in Canada and a founding member of Star Alliance, running 1,370+ flights a day. Covered reservations, ticketing and departure control systems.

- Tested end-to-end passenger flows: booking, rebooking, ticketing, reissue, PNR with SSRs, upgrades, check-in, boarding, offload/onload, transfers, schedule change, re-accommodation and inventory.
- Led a team of 6 on a Galileo (1G) integration project with EDIFACT and TTY messaging.
- Ran Inter-Airline E-Ticket (IET) and codeshare testing directly with partner airlines including Air India, SriLankan, GOL, TACA, LACSA, China Airlines and Shenzhen Airlines.
- Wrote test scenarios and cases for change requests and projects; kept the clarification log and closed open questions with the client.
- Reviewed test scripts, test data and outputs; maintained regression suites after each change request.
- Covered PCI and Partner Booking Communicator (PBC) testing, plus production support across time zones.
- Trained new team members and received the ACE Award.

PROJECT 9: Alfa Laval Automation *Feb 2010 - Apr 2010*

Role: Test Analyst | **Tools:** QTP, Quality Center

- Automated order creation, stock maintenance, order payment and delivery flows with QTP; logged defects in QC.

EDUCATION & CERTIFICATION

Bachelor of Technology, Anna University, India **2009**

- Department topper for 5 semesters; Best Academic Excellence Award.

ISTQB Certified Tester, Foundation Level **2011**
